4. Note the file name and press CONT. When export is complete click NO. Turn off the the instrument.

5. Remove the battery and press on the button in the top right of the compartment. When the button pops out press on it again, and the CF card will pop out.

- 6. Align the arrow on the CF Card with the arrow on the card reader and push it gently into the card reader.
- 7. Plug the card reader into your PC/laptop and your files .TXT and .DXF should be in the DATA folder
