FieldGenius Setting Out Report

Created: 20210902_DL

Microsurvey FieldGenius Version 10

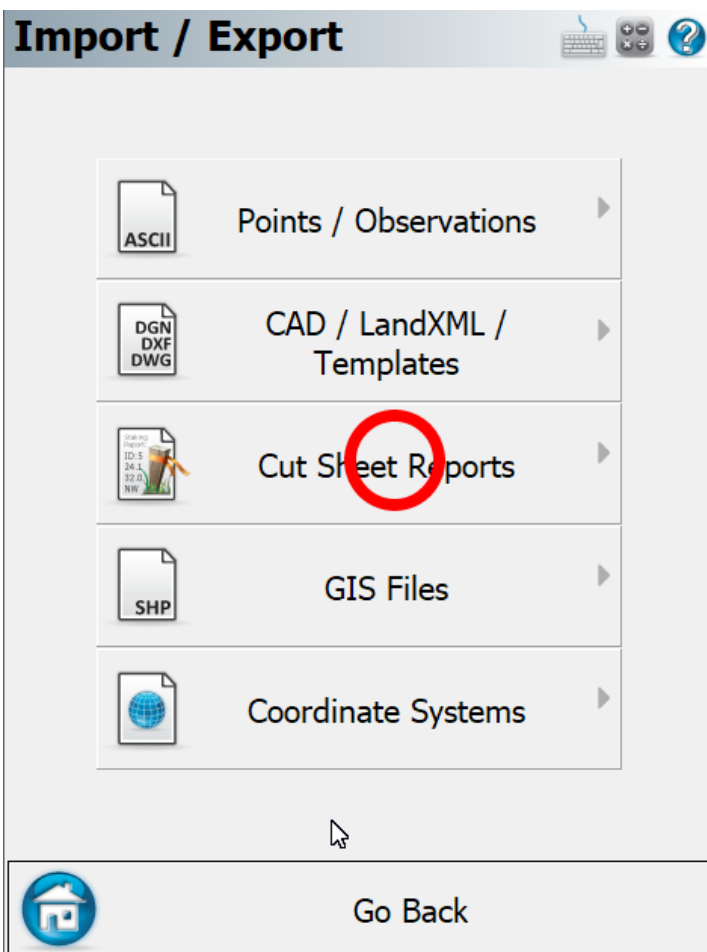

To get the Stake Out Report:
- for archived job: run FieldGenius and open your job, skip connecting to the instrument and go directly to the map view
- for the job you've just done: stay in the map view

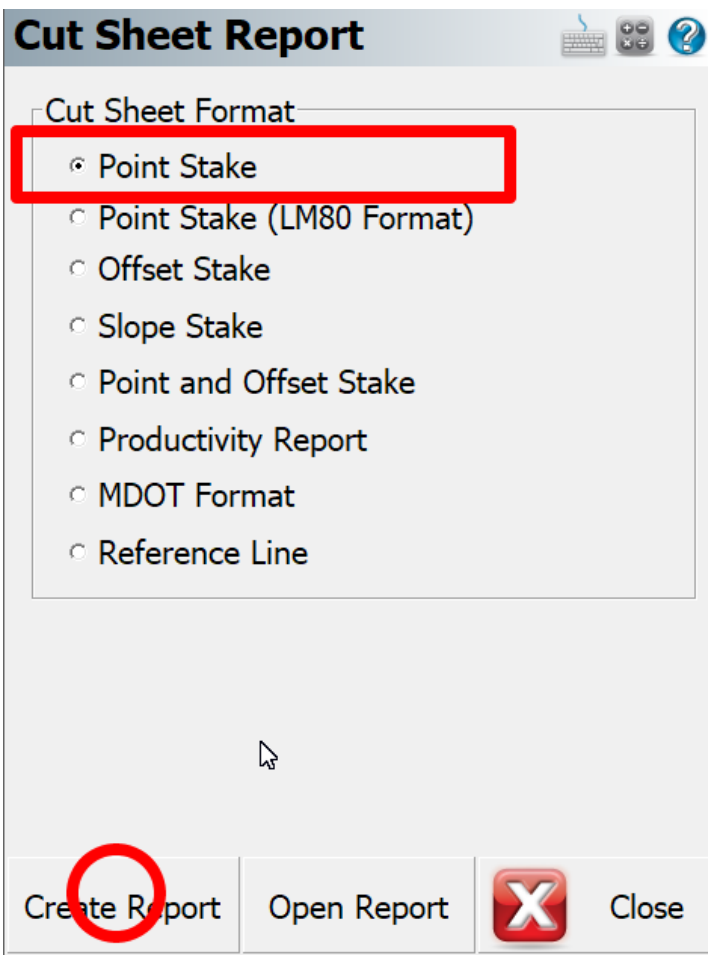

Go to Plumb Bob as on the screenshot

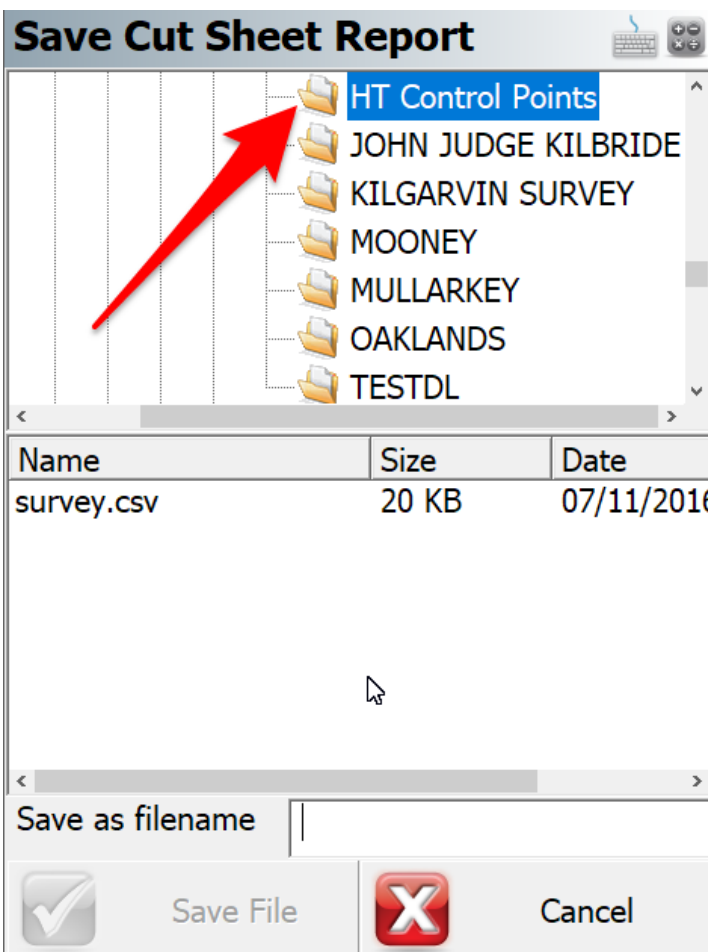

Go to Import/Export

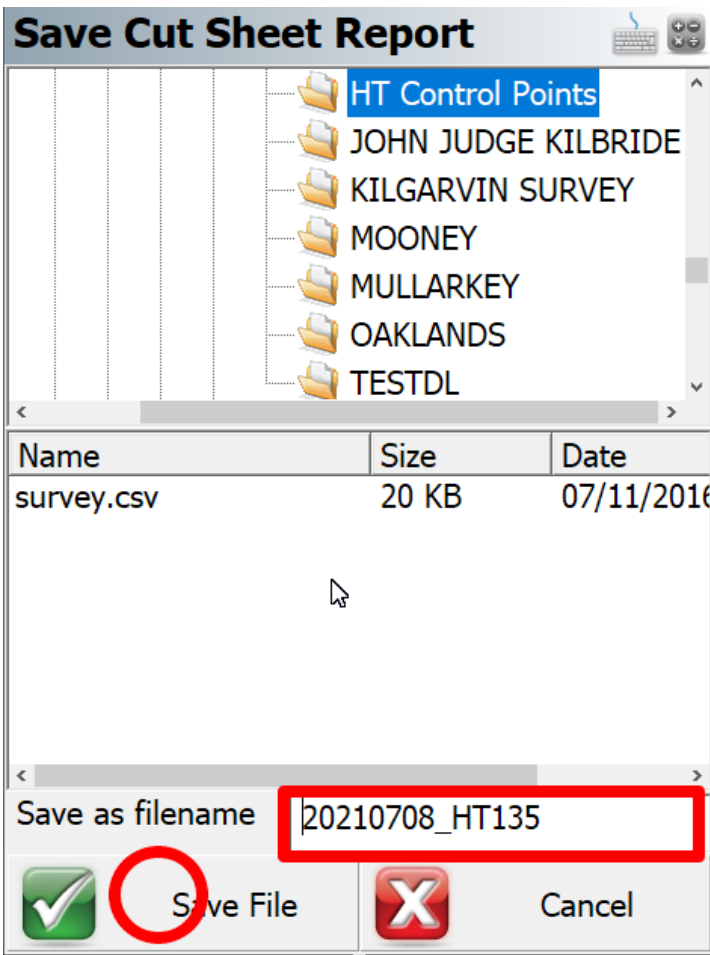

Go to Cut Sheet Reports

Choose Point Stake for the stake out report in CSV format (Excel)
Then go to Create Report

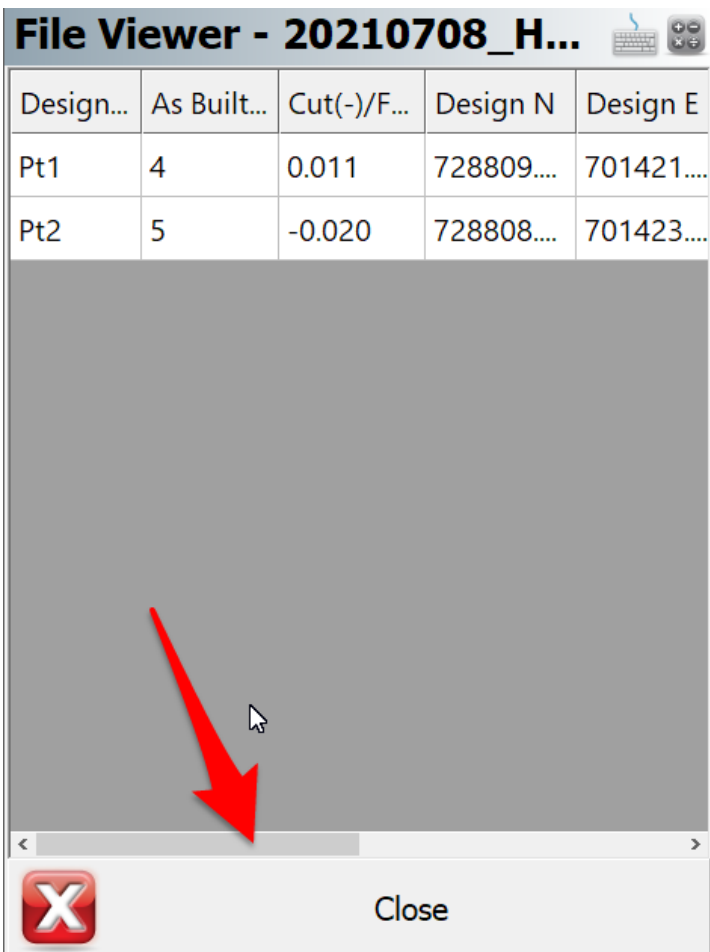

As default FieldGenius will highlight the current job folder. We recommend to leave it like that. If you need to change the location of the file use the file explorer tree to choose the proper folder and highlight it.
Note the access path for future reference.

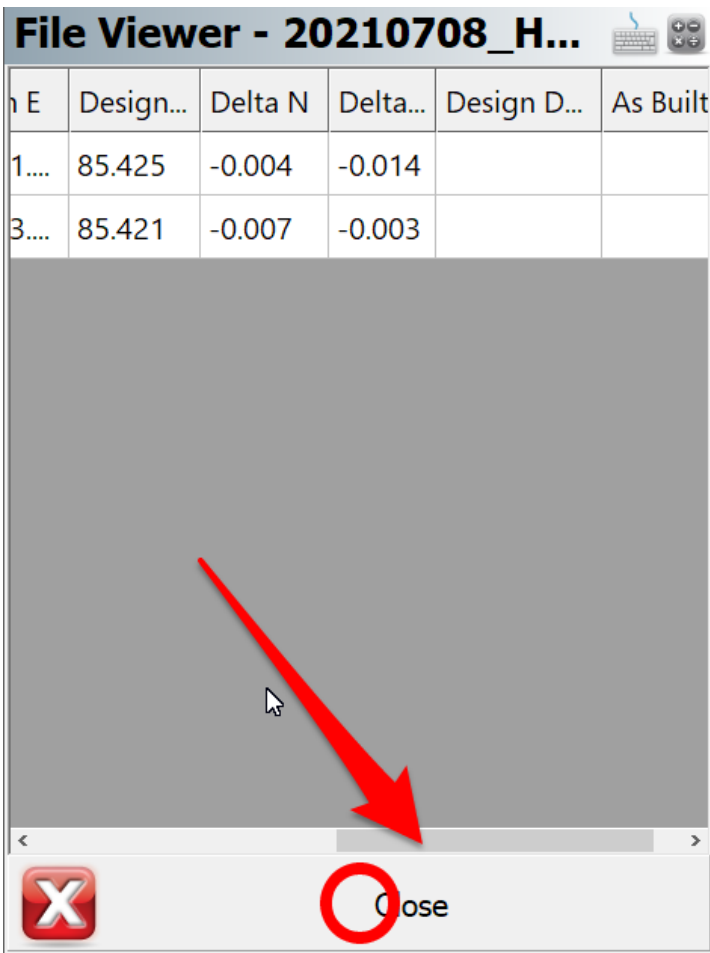

Put the name of the file into the Save as filename field. The file will be saved in CSV format (Notepad / Microsoft Excel / Google Spreadsheet)

Hit the Save button to save file.

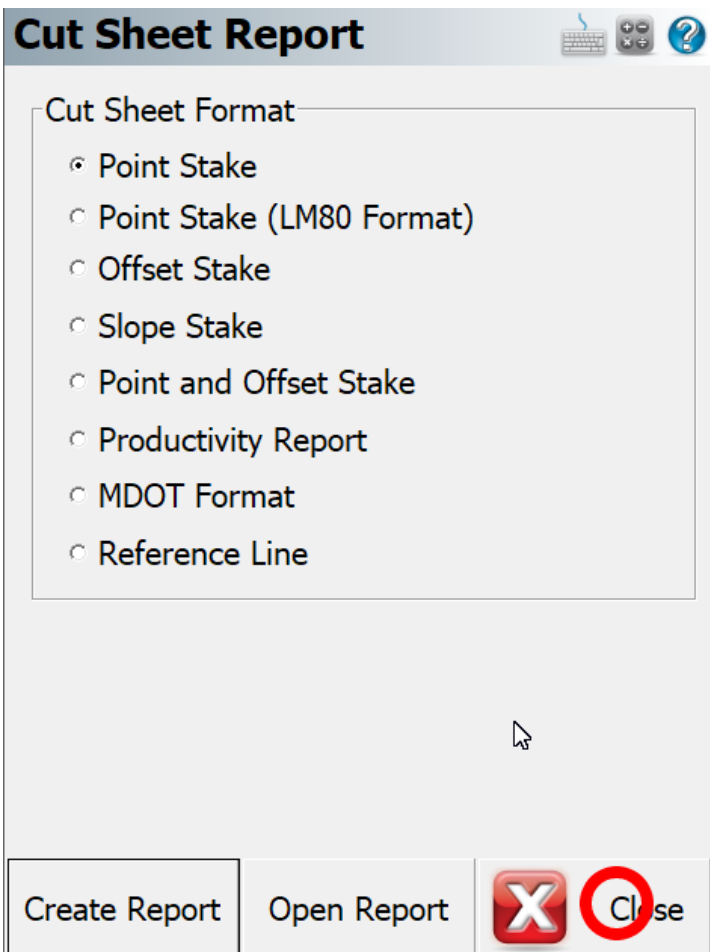

File will be automatically opened in the FieldGenius file viewer.

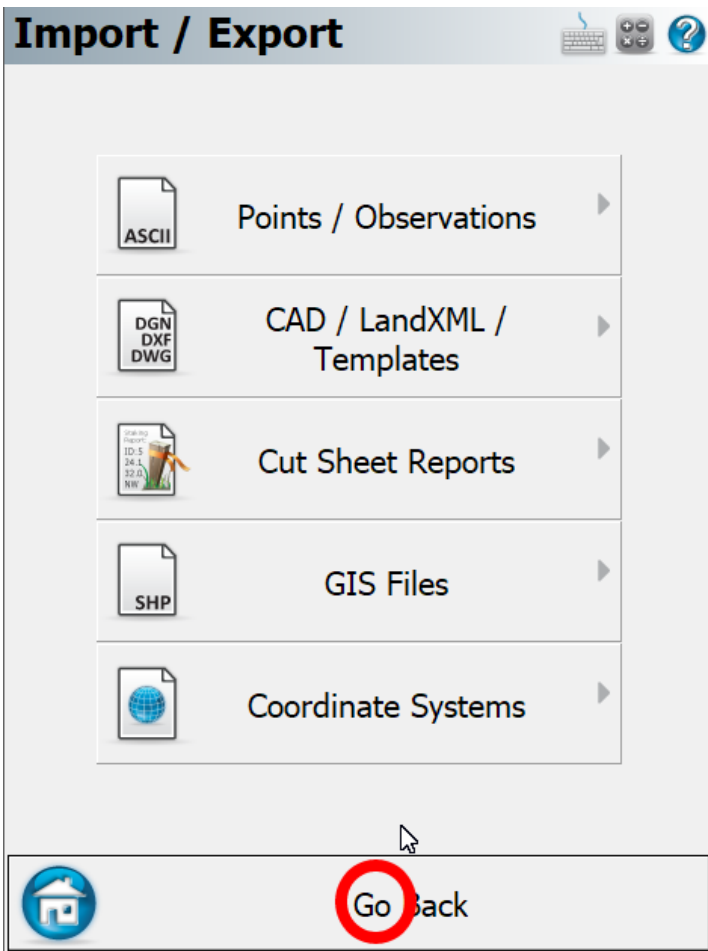

Scroll horizontally to see all the information

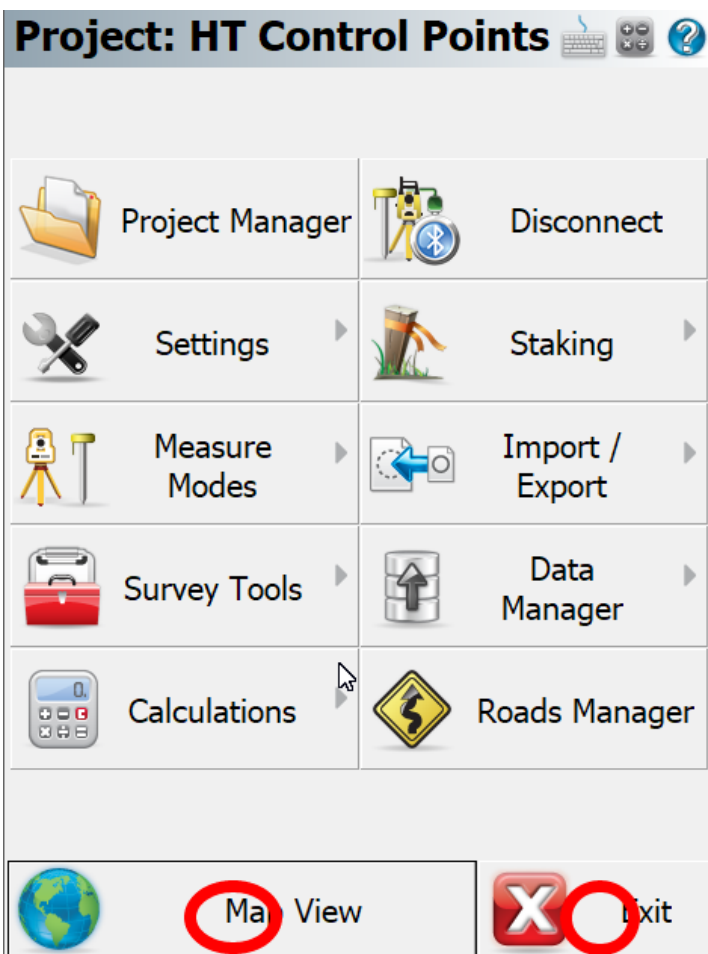

Scroll left and right to review the information.
Hit close to stop reviewing the file.

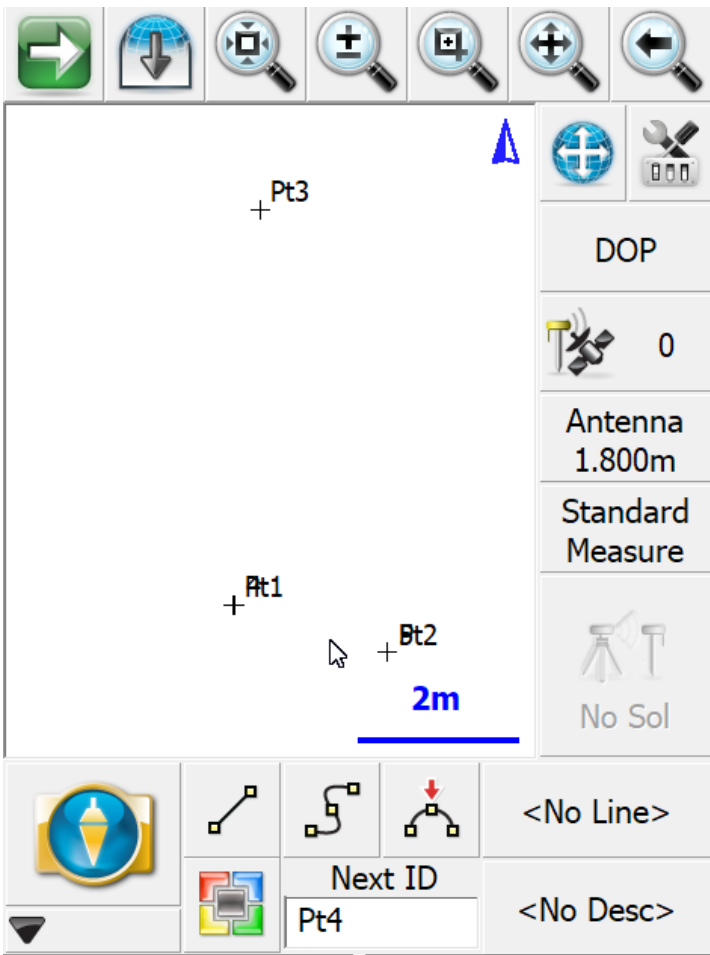

Hit Close to get back to the main menu

Go Back to main menu

Exit FieldGenius or go to Map View

**Access your file from the noted location.
Remember to exit FieldGenius before you
connect the logger to the computer**
