

# Using your phone internet with Field Genius

**You can use your Windows Mobile data logger with your phone hotspot to get the connection to the internet. First start mobile hotspot on your Iphone or Android Smartphone and then follow the screens:**

**Start** 12:15

**Settings** 12:16

**Connections** 12:16

**Wi-Fi** 12:19

**Wi-Fi** 12:19

**Wi-Fi** 12:19

**Wi-Fi** 12:20

After you've connected your data logger with your phone over WIFI start Field Genius software. Follow normal screen operations until you'll reach Link Configure screen
