How to export a survey to Autocad DXF by email

Created: 20201006_PH

Make sure parameters are as showns

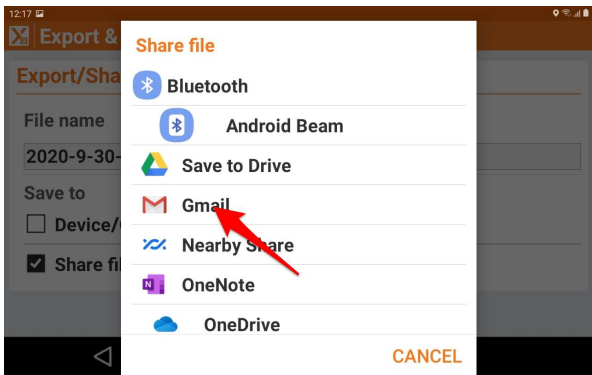

Scroll to the bottom of the page

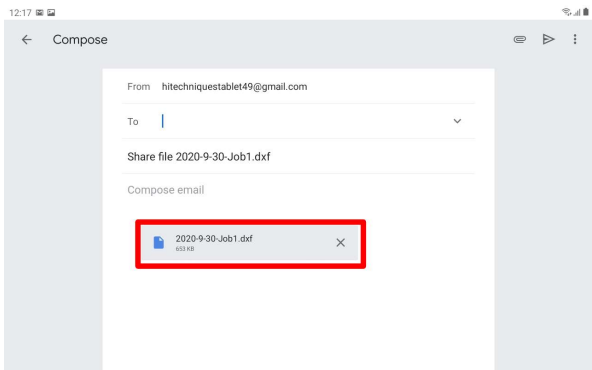

A default file name is proposed, you can change the file name if you wish

To save the file to a USB memory stick or on the tablet itself select Device/Cloud

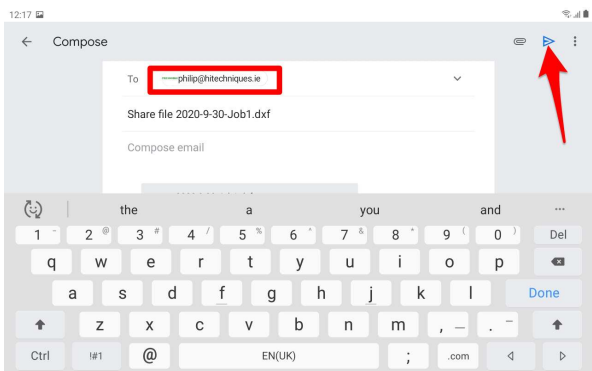

To export the file by email select Share file

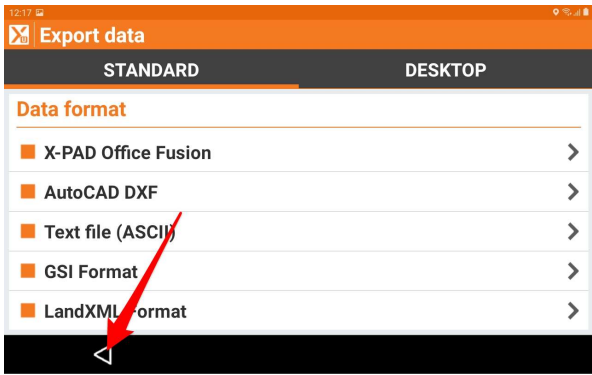

All tablets are set up with a default Gmail account

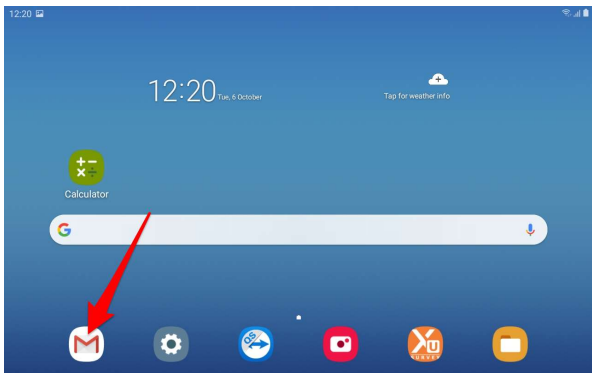

Make sure that the file is attached to the email

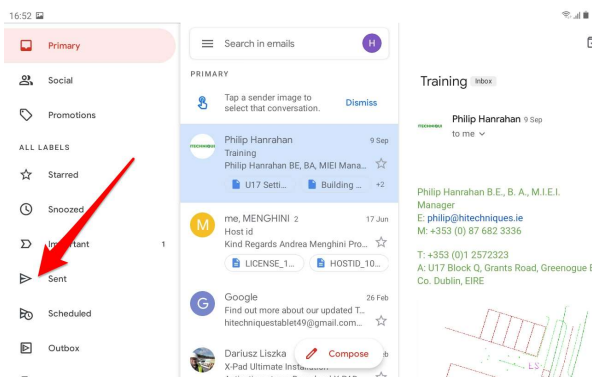

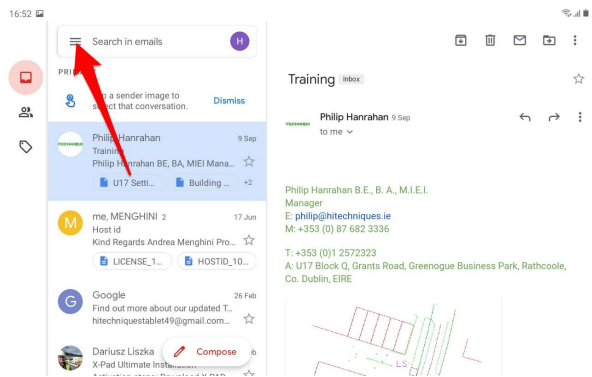

Enter the recipient's email address & tap the send icon

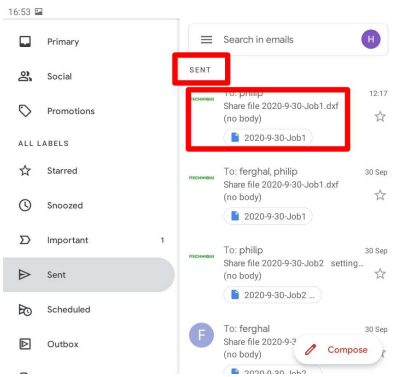

Go back to the Main Menu

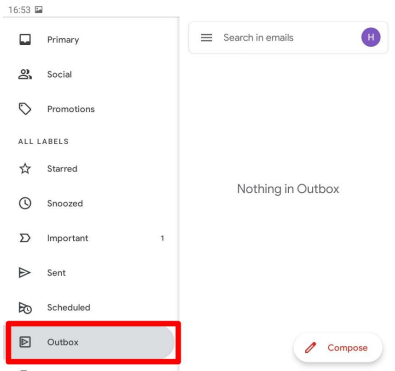

To confirm that a file has been sent, open Gmail

In the Sent folder, you will see your email and attachment is sent

If the email does not appear in the Sent folder, check if it is still in the Outbox folder. You can force sending by dragging down on the email and release
