## Freestation with X-PAD - Quick Guide

Created: 20191119\_DL

Quick Guide to Freestation

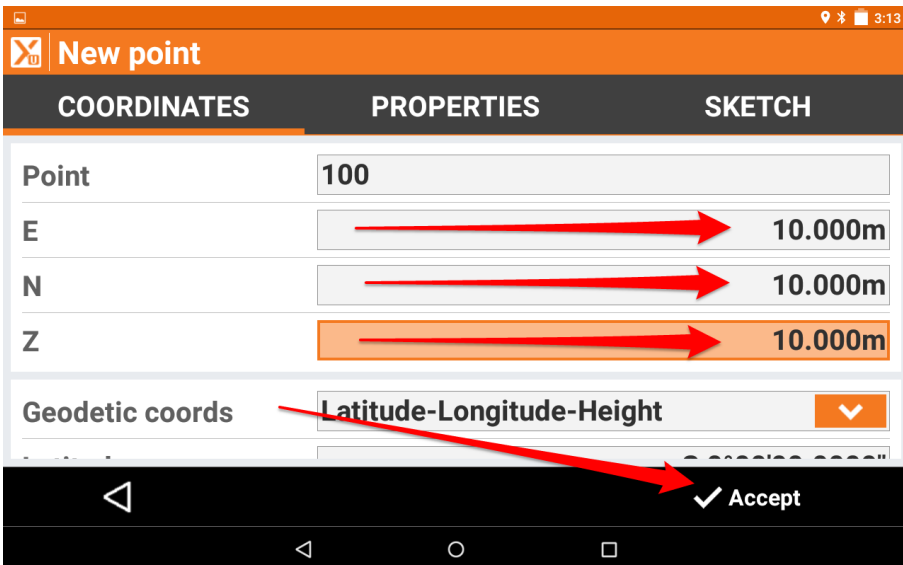

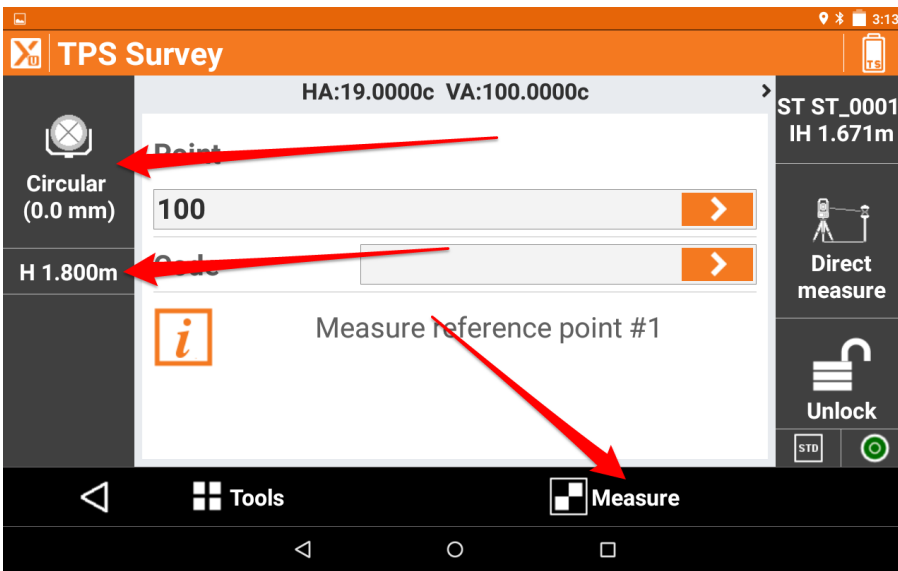

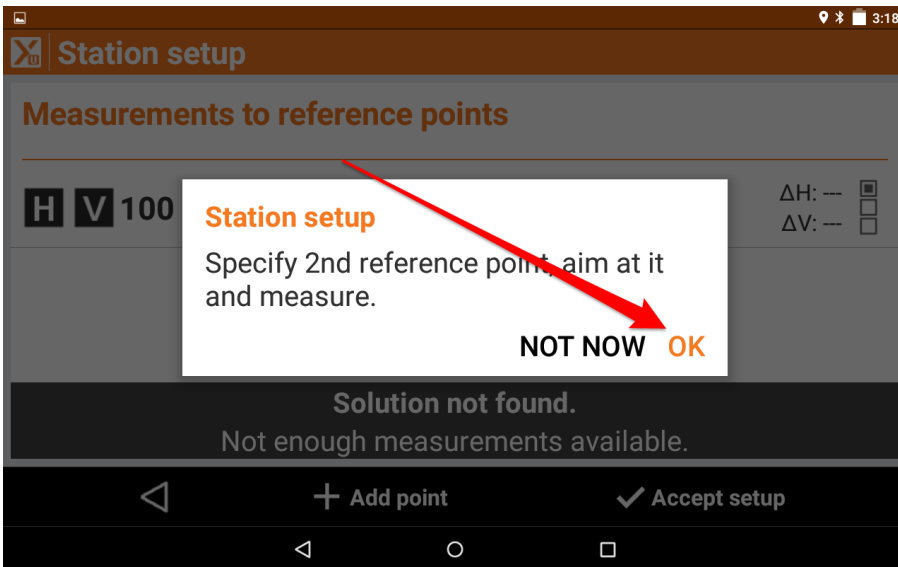

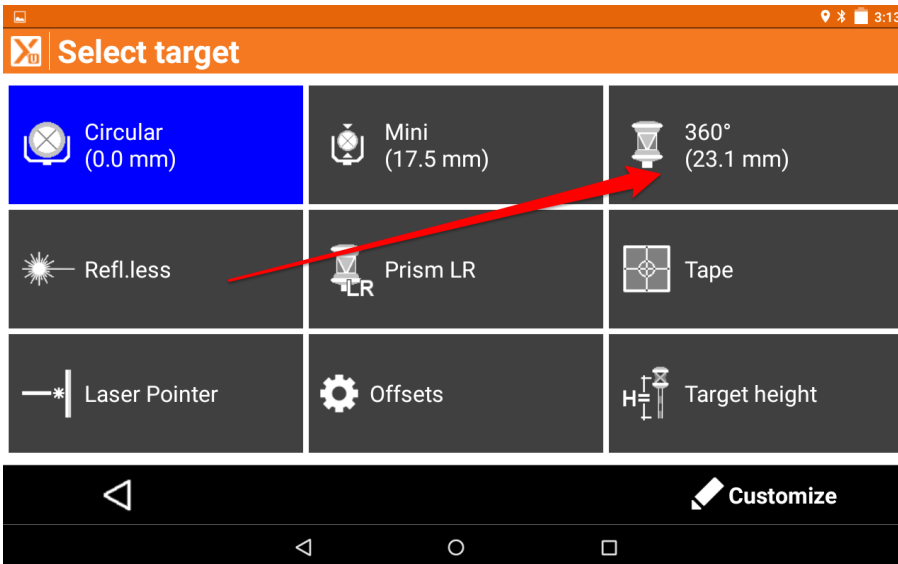

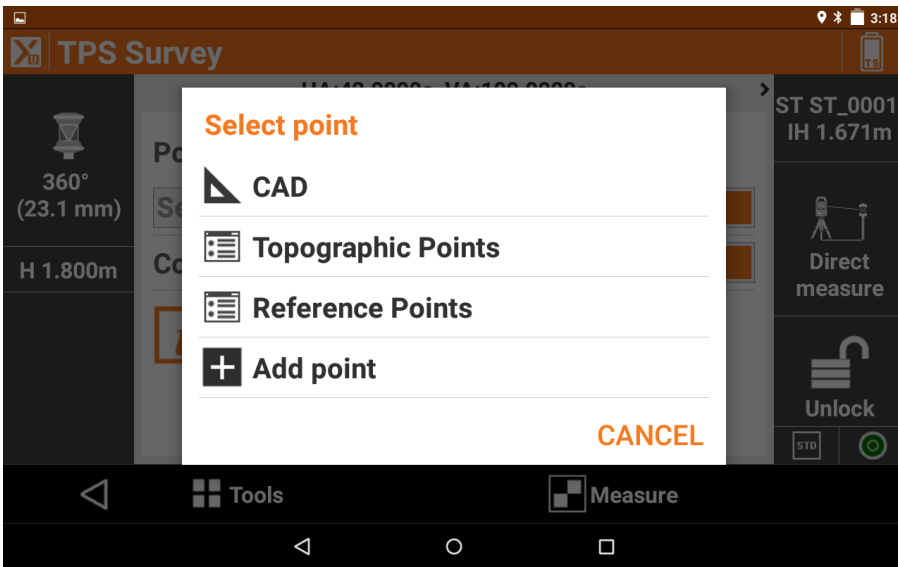

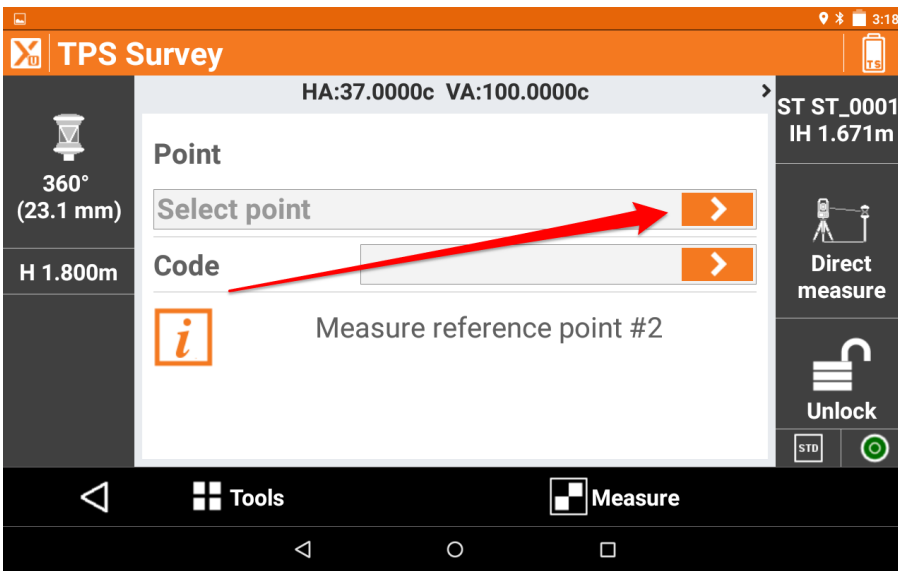

- Choose CAD for points you have imported
- Choose Topographic point for points you have measured with GNSS for example
- Choose reference points if you set up reference job
- Choose Add point if you want to manually add new point (this option is shown below)

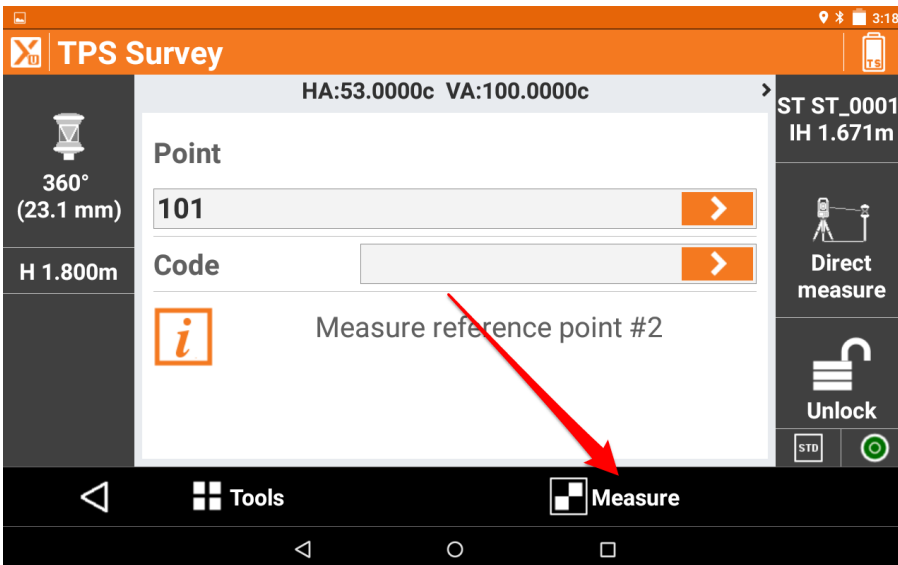

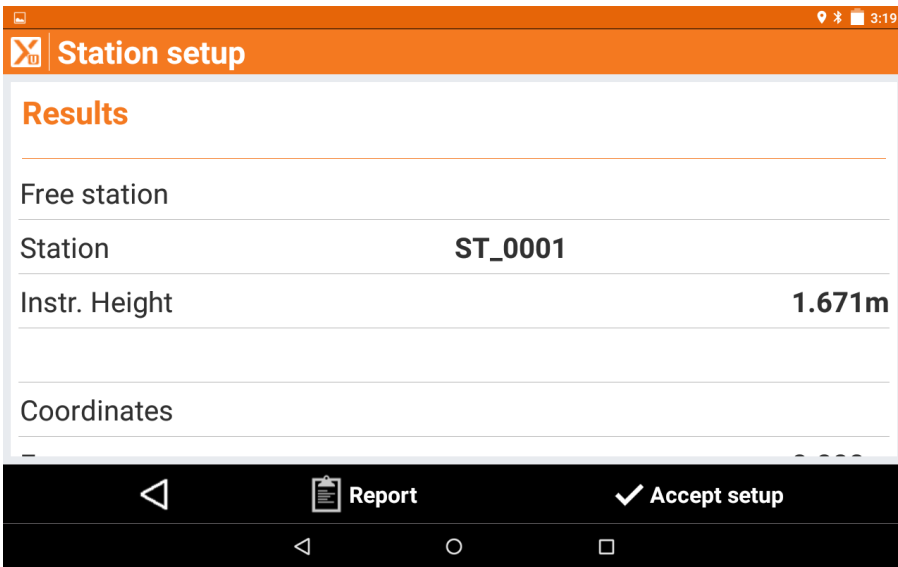

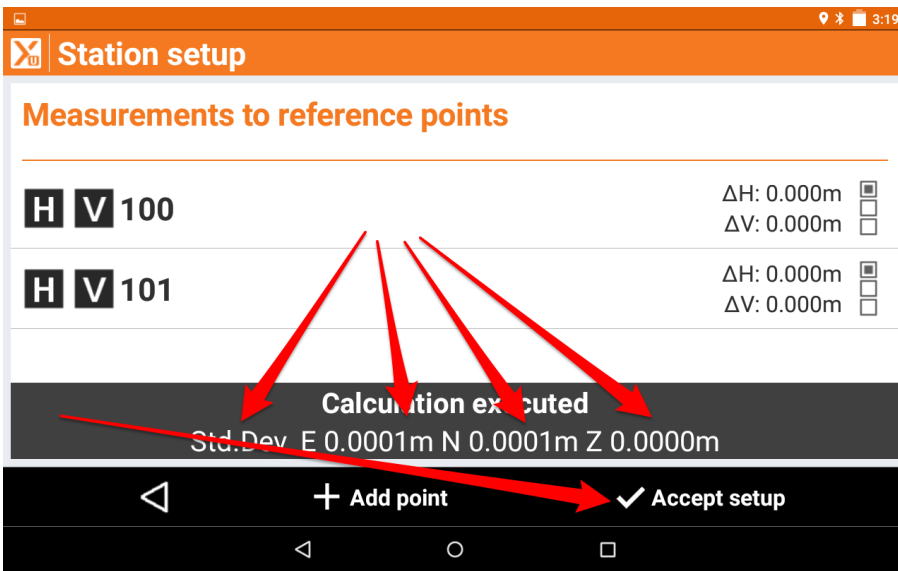

Target selection screen:

- Choose CAD for points you have imported
- Choose Topographic point for points you have measured with GNSS for example
- Choose reference points if you set up reference job
- Choose Add point if you want to manually add new point

Scroll down through all the information and be sure that you are happy with results.
